Mr. Frank Battaglia
USEPA Region I HSR-CAN3
JFK Building
Boston, MA 02283

Dear Mr. Battaglia:

The first round of ground water sampling at the CIBA-GEIGY Cranston, Rhode Island facility is scheduled to begin on 7 January 1991. We anticipate that this task will take two weeks to complete (through 18 January 1991). Additional time may be required if severe weather conditions are encountered during sampling.

Duplicate ground water samples from selected monitoring wells will be split with USEPA (or its oversight contractor). To ensure that the field schedule is not impacted by this activity, please coordinate USEPA's schedule with Woodward-Clyde Consultants - well in advance of the planned sampling event.

A site meeting between CIBA-GEIGY, USEPA, and WCC is schedule for Friday, 11 January 1991. We look forward to seeing you then.

Very truly yours,

Mark Houlday
Project Manager
